---

Professional Experience

CTO/Developer

iSpora — *Ogbomoso | July 2025 – Present*

- Designed and implemented end-to-end features for a social collaboration platform using React.js, Next.js, Node.js, and Laravel**.**
- Engineered smooth API integrations and fine-tuned MySQL queries to boost data efficiency and scalability.
- Contributed within agile development cycles, rolling out new modules and improvements with CI/CD pipelines.
- Delivered user-centric solutions with a focus on UI responsiveness, accessibility standards, and secure coding practices**.**

Software Developer

Getbusy— *Jos | June 2025 – Present*

- Built and maintained full-stack software and applications with React.js, Next.js, Node.js, PHP Laravel

- Integrated APIs and optimized database interactions (MySQL) for performance

- Collaborated in agile teams and delivered timely features using CI/CD best practices

- Ensured responsive design, accessibility, and security in production code

Web Developer

Flincap — *Lagos | Oct 2023*

- Built and maintained full-stack fintech applications with React.js and Node.js

- Integrated financial APIs and optimized database interactions (MongoDB) for performance

- Collaborated in agile teams and delivered timely features using CI/CD best practices

- Ensured responsive design, accessibility, and security in production code

Web Developer

BlueInc — *Abuja | Nov 2023 - Present*

- Designed front-end interfaces using Vue.js and Bootstrap

- Optimized page load speed by 25% using lazy loading and performance audits

- Contributed to scalable architecture and enhanced cross-browser compatibility

Web Developer (Contract)

Velhect — *Remote | 2022*

- Developed user-friendly, scalable websites with Laravel and Vue.js

- Worked with remote teams, aligning backend and frontend for seamless delivery

- Participated in daily standups and remote code reviews

Web Developer

ITSkillCenter — *Lagos | Aug 2021*

- Led the design and development of educational platforms and internal tools

- Designed MySQL schemas and built backend APIs for course and student management

IT Specialist

PlusWorld Roofing Ltd. — *Lagos | Jun – Aug 2021*

- Managed company-wide network configuration and system setup

- Improved data protection through system hardening and backups

---

Projects (Selected from GitHub)

Dellyman Logistics App

GitHub
Built a full-featured logistics platform for parcel and delivery tracking
Laravel, JavaScript, MySQL

Learning Management System (LMS)

GitHub
Custom-built LMS with course management and user authentication
Laravel, Bootstrap, MySQL

Food E-commerce App

GitHub
Developed full-stack e-commerce platform with cart, order, and payment features
React.js, Node.js, MongoDB

Music Streaming App

GitHub
Responsive streaming interface with playlists and user uploads
Laravel, HTML, CSS, JavaScript

Cyber Security Service App

Webifant

Responsive Cybersecurity service application

React.js, Node.js, firebase

 Sound Mastering App

Crysgarage-studio

Professional audio mastering platform designed for African by African. Get studio-quality masters in minutes, not hours.

React.js, Typescript, php laravel

Education

Diploma in Computer Networking
Federal University of Technology, Minna — *2021*

Certifications & Training

- Full Stack Web Development Certification — *2022*

- **DevOps Training** — *Ongoing*

- **Blockchain -** *Ongoing*
